HOUSING FACILITIES

Yes No N/A

Fail Notes

Chapter 67.3(1)(l) Housing Facilities

l. Outdoor dog runs and exercise areas shall be of sound construction and kept in good repair so as to safely contain the animal(s) therein without injury. Floors shall be concrete, gravel or materials which can be regularly cleaned and kept free of waste accumulation. Grass runs and exercise areas are permissible provided that adequate ground cover is maintained, holes are kept filled and the ground cover is not allowed to become overgrown. Dog runs and exercise areas utilizing wire floors are permissible provided that the wire floors are not injurious to the animals and are adequately maintained. Wire flooring cannot cause injury to any animal contained in a dog run or exercise area that has wire flooring and must: (1) Have a solid resting surface of adequate size for an animal to lay on its side; (2) Be in good repair, free of excessive rust that prevents required cleaning and sanitizing or that affects the structural strength of the surface or that may be detrimental to the health of the animal; (3) Be free of jagged or sharp edges, and constructed so as to lend itself to efficient cleaning and sanitizing; and (4) Be of a gauge and construction to prevent bending and sagging and to prevent physical harm to an animal or entrapment of the feet of an animal housed within the primary enclosure.

Chapter 67.3(2)(j) Housing Facilities

d. Animal waste, including used cat litter, must be removed from primary enclosures at minimum once daily or more frequently to prevent the accumulation of waste and contamination of the animals contained within the primary enclosure and must be discarded in accordance with state, county and local ordinances.

PRIMARY ENCLOSURES

Yes No N/A

10. Structure & Repair

☐ i i

11. Space

☐ i i

Fail Notes

Chapter 67.3(2)(g) Primary Enclosures

g. Group housing is permitted for animals that are compatible with one another, except as otherwise stated herein. Ample space shall be provided to prevent crowding and to allow freedom of movement and comfort to animals of the size which are housed within the primary enclosure. No more than 12 adult dogs or cats may be housed in the same primary enclosure. Dogs and cats shall not be housed in the same primary enclosure.

12. Ventilation & Temperature

Animal Welfare Inspection Form

Footnote 1

Notes:

Insulation (southside of main kennel) from above allowed to come into contact with animals. Please close gap by June 30, 2020.

Please trim excessive spray insulation foam at north wall of main kennel.

Footnote 2

Notes:

Please construct a temporary cover for hole to exterior at floor level, west wall.

Concern that lip of concrete (behind kennels) is not being cleaned effectively.

Footnote 3

Notes:

Galvanized wire welded mesh panels with excessive rust to be replaced by October 30, 2020.

Footnote 4

Notes:

Waste removal at south side of exterior training dog kennel does not occur. No drainage is available, run off of feces allowed to remain. Must remedy (immediately) re-inspection to occur June 30, 2020.

Standing water at south side of main kennel. Concern that floor is not being allowed to dry with C & D protocol.

Footnote 5

Notes:

Training exterior kennel could be considered crowded. Discussion that training is seasonal.

Footnote 6

Notes:

Whelping had the strongest odor of urine. This may or may not be due to a lack of ventilation. Re-inspection June 30, 2020.

Footnote 7

Animal Welfare Inspection Form

Notes:

Expect a written protocol at next inspection.

Footnote 8

Notes:

Concern for open bag of rat poison, not in use and not properly stored out-of-sight.

Footnote 9

Notes:

CVI missing for Minnesota canine.

Veterinary Inspection form not readily available. Will forward copy via email for completion by June 30, 2020.
